

MIZER® is a concentrated blend of surfactants and polymers for application through irrigation systems.

MIZER makes better use of irrigation applied water on hydrophobic soils leading to savings in water use.

- ✓ *Low burn potential for both cool and warm season grasses*
- ✓ *Easy to mix even in cold water*
- ✓ *No excessive foaming problems*

CONTAINS NON-PLANT FOOD INGREDIENTS:

Active Ingredients

Polyhydroxyethyl alkoxy alkylene oxides.....	10%
Alkylpolyoxyethylene	15%
Inert Ingredients	75%
TOTAL	100%

BEFORE USING THIS PRODUCT READ ALL PRECAUTIONS, DIRECTIONS FOR USE, AND WARRANTY DISCLAIMER AND NOTICE

KEEP FROM FREEZING

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.regulatory-info-lpi.com>

NET CONTENTS:

- 30 GL (113.6 L)
- 275 GL (1040.9 L)

Loveland Products, Inc. • PO Box 1286 • Greeley, CO 80632-1286

CAUTION: Irritating to eyes. Harmful if inhaled. Avoid breathing vapors or spray mist. Avoid contact with skin, eyes, or clothing. Do not apply this product in such a manner as to directly or through drift expose workers or other persons. Keep out of reach of children.

FIRST AID: If Inhaled: Move victim to fresh air. Give artificial respiration if needed. Call a physician. **If Swallowed:** Give a large amount of water to drink, make person vomit and immediately call a physician. Do not induce vomiting or give anything by mouth to an unconscious person. **If in Eyes:** Immediately flush eyes with clean water for at least 15 minutes. Call a physician. **If on Skin:** Remove contaminated clothing and wash skin with soap and water. Call physician if irritation persists. If contact is made with the spray solution containing pesticides, follow the "Statement of Practical Treatment" on the pesticide label.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL 1-866-944-8565.

DIRECTIONS FOR USE: MIZER® should be applied according to a managed application program. MIZER is designed to be applied via irrigation system using standard injection equipment and spray equipment. Guidance on the calibration of injection equipment is available from the equipment manufacturer. Make the first application at the beginning of the growing season at the maximum rate and repeat 7 to 10 days later. Make further applications at the maintenance rate at 30-day intervals thereafter or as necessary as judged by the severity of the drought stress. MIZER does not require watering in after application. If wetting agents are used as part of the program, in all cases, these should be watered in immediately after application preferably by hand syringing or alternatively using automatic irrigation, which typically should be in operation for 20 minutes. This is especially important during warm or hot weather.

PPM Unit Calibration: The ppm unit has settings ranging from 1 to 10. The dilution rate varies according to several factors including temperature, pressure, flow rate and wetting agent viscosity. As a general guide the ppm unit is capable of injecting wetting agents between 0.75 and 17 oz/min dependent on the above factors.

To determine which setting to use on the ppm unit, make the following calculations:

$$\frac{\text{Area irrigated per cycle} \times \text{Rate of MIZER per acre in oz (normally 16 to 24 oz per acre)}}{\text{Average time per irrigation cycle (in minutes)}} = \text{ounces per minute}$$

APPLICATION RATES			
Dosage	Use Areas	Rate/Acre	Rate/1,000 sq. ft.
Maximum Rate	Golf green or tees, golf fairways and sports fields and other turf areas	32 oz	0.73 oz
Maintenance Rate	Golf green or tees, golf fairways and sports fields and other turf areas	16 to 24 oz	0.37 to 0.55 oz

STORAGE AND DISPOSAL

STORAGE AND DISPOSAL: Store in original container only. Keep container tightly closed, do not allow water to be introduced into the contents of this container. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment washwaters or spray waste. Do not store near heat or open flame. **CONTAINER DISPOSAL:** Triple rinse (or equivalent) and add rinsate to spray tank, then offer for recycling or reconditioning, or puncture and dispose of according to state and local authorities. If burned, stay out of smoke. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
