## LIQUID FISH FERTILIZER

ALL NATURAL • BIO-STIMULANT

Promotes  
vigorous  
growth of plants  
and vegetables

3-3-3  
1 US Quart (25 Liters)  
Net Weight 2.1 lbs. (950 g)

Fish fertilizers have been used for hundreds of years. Native Americans first demonstrated how to use fish to grow healthier and more bountiful crops. Organic Gem® Liquid Fish Fertilizer transforms 70 trace minerals and micronutrients into a form that can be easily assimilated through a plant's root system. This bio-stimulating effect results in vigorous, healthy growth for your plants and vegetables. Our manufacturing process takes significantly less time than our competitors, resulting in lower processing costs, which we pass on to you, the customer.

### GUARANTEE ANALYSIS:

Total Nitrogen (N)	3%
Available Phosphoric (P2O5)	3%
Potassium (K)	3%

### INGREDIENTS:

Fish, Phosphoric Acid (added as stabilizer)  
Manufactured and Distributed by:  
Advanced Marine Technologies (AMT)  
49 Hassey Street,  
New Bedford, MA 02740  
Phone: (508) 991-5225  
Web: www.organicgem.org

### DIRECTIONS:

1. Shake well before using.
2. Prepare for one application only. Follow application rates provided below.
3. Mix well with water.
4. Minimum dilution rate: 15 parts water to one part fertilizer.
5. Use all mixed solution. Do not store in diluted form.
6. Wash hands and all equipment thoroughly after use.

### APPLICATION RATES:

**House Plants:** Use 1 tablespoon per gallon of water. Apply using watering can. Feed every 2 weeks.

**Outdoor Plants:** Use 3 tablespoons (1 fluid ounce) per gallon of water. Apply using watering can or Ortho Grow-up (or similar product). Feed flowers and vegetables every 2 weeks. Apply generously to soil or as a foliar feed until leaves are wet, top and bottom. For best results, foliar feed early or late in the day.

**Lawns:** Use 4 ounces per gallon of water. One gallon of fertilizer mixed with 30-40 gallons of water will cover 1/4 acre. Apply using Ortho Grow-up (or similar product). Feed lawn every 4 weeks.

**Trees & Shrubs:** Use 8 ounces per gallon of water. Feed by boring several small holes in the soil 1 to 2 feet away from the root ball. Fill holes with solution. Feed 2-3 times per season.

**Compost Starter:** Use 4 ounces per gallon of water. Mix into compost whenever additional material to be composted is added.

**CAUTION:** Keep out of reach of children. Not to be taken internally. Buyer assumes all responsibility for safety and use not in accordance with directions.
