Turf Benefits

- Duration CR[®] fertilizers release nitrogen slowly and continually throughout the plant's growth cycle, resulting in precise, predictable feeding that lasts for weeks. Duration CR[®] will take the worry out of maintaining healthy turf while giving you the exceptional performance you demand.
- Duration CR[®] is designed to release nitrogen based on soil moisture and temperature, allowing you to plan your applications based on the needs of the plant.
- Mid-sized prills (SGN 185) provide a more even distribution than regular-sized (SGN 225) fertilizers applied at the same rate.
- Iron provides deep green color without excessive top growth. Iron sucrate technology increases nutrient availability and uptake throughout the growing season while minimizing mower pick-up with the revolutionary dispersing granule technology.
